

## DIY-Sustainability Activities

### Switch to Reusable Items

Replace single-use plastics with reusable bags, bottles, and containers.

### Plant a Vegetable Garden

Start a small garden to grow your own vegetables and herbs, reducing carbon footprint and packaging waste.

### DIY Composting

Begin composting kitchen scraps to reduce waste and create nutrient-rich soil.

### Eco-Friendly Transportation Week

Commit to using public transport, carpooling, biking, or walking instead of driving alone.

### Water Usage Reduction

Install water-saving devices and adopt practices to reduce water consumption.

### Energy Conservation Day every week

Spend a day using minimal electrical energy—turn off lights when not needed, unplug devices, and use energy-efficient appliances.

### Adopt a Meatless Day

Choose one day a week to eat vegetarian or vegan meals to reduce carbon and water footprints.

### Educational Documentary Night

Host a viewing of documentaries on environmental issues to raise awareness and spark discussions.

### Start a Sustainability Blog or Vlog

Share experiences, tips, and challenges of trying to live sustainably.

### Join a Sustainability Challenge

Participate in online challenges focused on reducing carbon footprint, such as zero waste challenges.

### Promote Local and Seasonal Eating

Commit to buying local produce to support local farmers and reduce transportation emissions.

### Learn About Local Biodiversity

Explore local parks and learn about native species and their roles in the ecosystem.

## DIY-Volunteering Activities

### Build Birdhouses

Create shelters for local bird populations using reclaimed wood and eco-friendly materials.

### Make Bee Hotels

Construct resting spots for bees using bamboo sticks, wood, and other natural materials to support pollinator populations.

### Plant Trees

Organize tree-planting events using native species to enhance local biodiversity and combat climate change.

### DIY Rainwater Harvesting System

Set up systems to collect and use rainwater for gardening and other non-potable uses.

### Create Seed Bombs

Mix clay, soil, and native wildflower seeds to make seed bombs for beautifying and diversifying green spaces.

### Create Wildlife Water Features

Set up small water basins or bird baths to provide clean drinking spots for wildlife.

### Start a Recycling Drive

Collect recyclable materials that are not typically picked up by local services, such as certain plastics, styrofoam, or electronics.

### Install Bird and Bat Conservation Structures

Build and install nesting boxes and roosts for bats and birds to enhance local conservation efforts.
